Submissions should be submitted to the journal's online submission system: work.editorialmanager.com - under Section: *Advancements in Telehealth*.

All publication fees for this special issue are waived.

Call for Papers

Special Issue on Advancements in Telehealth

In the wake of the COVID-19 pandemic and the push towards a more virtual world, a huge number of individuals seeking rehabilitation and occupational services have received care through web-based communication platforms. These domains, including teleconsultation, telerehabilitation, and teleexercise, and especially popular amongst younger cohorts. Despite widespread use of these technologies, the literature remains relatively sparse with regards to clinical efficacy and patient satisfaction with virtual rehabilitative platforms.

Thus, in this special issue entitled ***Advancements in Telehealth: Empowering Occupational Health through Teleconsultation, Telerehabilitation, and Teleexercise for the Prevention and Treatment of Musculoskeletal Disorders Across Occupations***, we invite experts from different countries with various expertise to submit their valuable papers to advance

our understanding of this important new avenue to reach patients and clients.

Topics include but are not limited to:

- Efficacy and effectiveness studies
- Outcomes for specific classes of injury or illness
- Models to enhance outcomes
- Presentation of current situation and a vision to the future
- Benefits and deficits of telerehabilitation, teleconsultation and teleexercise
