

Call for Papers – Special Issue

Application of Artificial Intelligence in Cancer Research

The Editorial Board of *Cancer Biomarkers* is planning a special issue entitled “Artificial Intelligence in Cancer Research” due for publication in late 2021. We are actively soliciting original research related to the application of artificial intelligence to problems in cancer research, including but not restricted to cancer biomarkers.

Cancer Biomarkers (ISSN 1574-0153) is a peer-reviewed print and online journal, with an Impact Factor of 3.436 according to Journal Citation Reports (Clarivate, 2020). It is supported by an international Editorial Board consisting of a distinguished team of cancer researchers from major institutes around the world. More details about the journal can be found at: iospress.com/cancer-biomarkers.

For information on formatting your manuscript, please see the author instructions [here](#).

Submitted papers should not be under consideration for publication elsewhere. Full manuscripts will be considered up until June 1, 2021 and authors are requested to submit their manuscript electronically via the journal’s editorial management system, selecting the section “Applications of Artificial Intelligence to Cancer Research” on submission.

Submission deadline: June 1, 2021

If you have any queries about the submission procedure, please contact the Editorial Office:
